

Blender

Blender is a 3D graphics application released as free software under the GNU General Public License. It can be used for modeling, UV unwrapping, texturing, rigging, water simulations, skinning, animating, rendering, particle, and other simulations, non-linear editing, compositing, and creating interactive 3D applications, including games. Blender is available for a number of operating systems, including Linux, Mac OS X, and Microsoft Windows. Blender's features include advanced simulation tools such as rigid body, fluid, cloth and softbody dynamics, modifier based modeling tools, powerful character animation tools, a node based material and compositing system and Python for embedded scripting.

Gimp

Gimp is an acronym for GNU Image Manipulation Program. It is a freely distributed program for such tasks as photo retouching, image composition and image authoring. It has many capabilities. It can be used as a simple paint program, an expert quality photo retouching program, an online batch processing system, a mass production image renderer, an image format converter, etc. GIMP is expandable and extensible. It is designed to be augmented with plug-ins and extensions to do just about anything. The advanced scripting interface allows everything from the simplest task to the most complex image manipulation procedures to be easily scripted.

Inkscape

An Open Source vector graphics editor, with capabilities similar to Illustrator, CorelDraw, or Xara X, using the W3C standard Scalable Vector Graphics (SVG) file format.

Inkscape supports many advanced SVG features (markers, clones, alpha blending, etc.) and great care is taken in designing a streamlined interface. It is very easy to edit nodes, perform complex path operations, trace bitmaps and much more. We also aim to maintain a thriving user and developer community by using open, community-oriented development.

VLC

Windows Media Player and iTunes are the most popular media players available for home computing, but the VLC media player is beginning to rank as one of the best media players available-and it's free. The VLC media player features a simple design and setup, but the program can do so much more than just play music or video files. This is one of the most advanced video players and is essential for anyone who plays or edits videos using a computer.

Thunderbird

As a messaging system produced by a non-profit, public benefit company, is uniquely positioned as the tool that users can use to integrate as many of their communications as they want. By combining an open architecture, a powerful extensibility and customization framework, and a person-centric perspective on communications, Thunderbird is a powerful yet enjoyable tool to help individuals manage their online interactions - whether that's email, instant messaging, social networking messages, or other types of message. Thunderbird will evolve to embrace the Web, by continuing to blur the distinction between what's on the web and what's on the desktop, while keeping in mind the importance of keeping the individual in charge of their online experience.

Firefox

Mozilla Firefox is a free and open source web browser descended from the Mozilla Application Suite and managed by Mozilla Corporation. Firefox has 23.75% of the recorded usage share of web browsers as of September 2009[update], making it the second most popular browser in terms of current use worldwide after Microsoft's Internet Explorer. Firefox runs on various versions of Mac OS X, Microsoft Windows, Linux, and many other Unix-like operating systems.

Sunbird

Mozilla-style ease-of-use for your calendar. Sunbird® lets you manage your schedule easily, and store it where you want to.

You may prefer Sunbird if...

- * you prefer your calendar to be separate from your email client
- * you don't currently use Mozilla Thunderbird for your email
- * you don't like adding add-ons (such as extensions or themes) to your applications.
